SUMMARY

Mathematician moving into data and operational risk in finance. My doctoral work is about breaking down complex problems, building models that hold up, and getting the reasoning across clearly. That's the same skill set behind mapping a process, catching what doesn't add up in the data, and keeping it clean. I want an entry point into finance where that analytical background does real, measurable work.

EDUCATION

PhD in Mathematics	2022 – Sept 2026
<i>Universidade Federal do ABC (UFABC) – CAPES Scholarship</i>	
MSc in Mathematics	2019 – 2022
<i>Universidade Federal do ABC (UFABC) – CAPES Scholarship</i>	
BSc in Mathematics	2018 – 2022
<i>Universidade Federal do ABC (UFABC) – UFABC Scholarship</i>	
BSc in Science and Technology	2014 – 2018
<i>Universidade Federal do ABC (UFABC) – CNPq/UFABC Scholarship</i>	

INTERNATIONAL EXPERIENCE

Visiting Doctoral Researcher	Jan 2026 – Feb 2026
<i>Scuola Normale Superiore di Pisa (SNS) – CNPq Scholarship</i>	
Conducted original research in a highly demanding analytical environment with international collaboration.	
Visiting Doctoral Researcher	Jan 2025 – Jul 2025
<i>Carnegie Mellon University (CMU) – CNPq/FAPESP Scholarship</i>	
- Collaborated with researchers from multiple countries in a high-performance environment. - Presented research results to international technical audiences at CMU, the Mathematical Congress of the Americas (University of Miami), and other national and international conferences.	

SKILLS

Analytical - Structuring and solving complex problems - Mathematical and probabilistic modeling - Strong analytical ability	Interpersonal - Technical communication - Multidisciplinary collaboration - Continuous learning
Quantitative - Applied statistics - Advanced probability - Simulation (basic)	Programming - Python (basic) - SQL (basic)
Languages - Portuguese - English	

PRESENTATIONS

Contributed talk — CEMAT²	Oct 2025
<i>Universidade Federal do ABC (UFABC), Santo André, Brazil</i>	
Poster presentation — Brazilian Mathematics Colloquium (CBM)	Jul 2025
<i>Instituto de Matemática Pura e Aplicada (IMPA), Rio de Janeiro, Brazil</i>	
Contributed talk — Mathematical Congress of the Americas (MCA)	Jul 2025
<i>University of Miami, Miami, USA</i>	
Contributed talk — Graduate Student & Postdoc Seminar (GSPS)	Mar 2025
<i>Carnegie Mellon University (CMU), Pittsburgh, USA</i>	

IN PROGRESS

Making a deliberate move into quantitative and data work for finance. Currently learning Python (pandas) and SQL to go with my analytical background into operational risk and market infrastructure.
